

The Vision of Sea Isle City's Government

We want Sea Isle to be a place where everybody wants to be.

We want Sea Isle to be the home that everybody dreams of when they dream of living at the shore.

We want Sea Isle to be a premier destination resort, while maintaining a small town, community atmosphere.

We will foster respect for the environment and understanding of the sensitivity of living on a barrier island.

We will strive to forge strong relationships between the public and private sectors, to ensure the viability and vitality of our restaurant, entertainment, and business industry.

We will strive to forge strong relationships with all of our citizens – residents and visitors alike; and remember always that the role of government is to serve the people.

We will forge our relationships with our constituency by embracing our core values: respect, integrity, tolerance, and commitment to excellence; and with these core values in mind,

We envision a government that is respectful of all citizens and all points of view;

We envision a government that recognizes that the integrity of its reputation is paramount, and does everything in its power to retain its integrity;

We envision a government that is tolerant, but will not tolerate disrespect or dishonorable actions; and

We envision a government that is committed to a culture of excellence.
